

Entrust Cloud Web Filtering Service

Through our partnership with Censornet, we provide sophisticated yet simple to use web filtering products for businesses, education, non-profit organisations and service providers. We help organisations limit their exposure to Internet threats, illegal content, offensive images and time wasting - helping them to be more productive; more secure and reduce legal liability

How does it work?

You download and install the cloudwebfiltering client software (available for Windows, Android and iOS devices); login using the credentials we supply you and that's it – your web browsing is secured. Via the self-service management console, you can configure policies for your staff, block and unblock sites or content types – even configure the times that certain types of site will be available.

All the facilities can be administered self-service or you can ask us to make needed changes for you, subject to a small charge.

entrust Cloud Web Filtering Pricing	Monthly	Annual
Academic or not for profit (per user)	£1.00	£11.00
Commercial (per user)	£1.50	£16.50
Installation & initial configuration (per device)	£10.00	
Changes	£25.00
