

Hosted Exchange

Hosted Microsoft Exchange is the gold-standard communication platform for business and not for profit organisations. It combines email, calendars, meetings, public folders, syncing to mobile devices and more. The entrustIT hosted exchange service makes all these advanced features available to you without fuss. We take care of licences, servers, backups, spam-filtering, anti-virus protection and all the upkeep. Leaving you free to concentrate on the important things – like running your business.

Entrust Hosted Exchange replaces the uncertainty and hassle of running an in-house mail server with the reliability of world class UK infrastructure, delivered from one of our Tier IV datacentres with ISO27001 (information security) certification. Subject to a compliance regime? No problem, we can accommodate your compliance needs, just talk to us.

Our standard hosted exchange service provides the following benefits:

- **Remote access** via webmail on any internet enabled device
- **Support services** and a 99.99% uptime guarantee
- **Mobility** with direct push for email, tasks, contacts and calendars on most hand held devices running operating systems from Microsoft, Google, Apple & others
- **Collaboration** with shared calendars, contacts, tasks and notes, group scheduling and meeting planning.
- **Anti-Spam and Anti-Virus protection** from our portfolio of cloud computing services
- **Security** and Privacy delivered from our ISO 27001 accredited Tier 4 Data Centres based in the UK for UK customers

- **Integration** to our hosted desktop environment allowing you to collaborate with consumers of other entrust cloud services

- A **10Gb** mailbox

Our enterprise hosted exchange service provides the following additional benefits:

- Microsoft or OS/X Desktop access via a copy of **Microsoft Outlook** provided by us
- A **25Gb** mailbox
- Access to our email **archiving** platform & **compliance** assistance
